

# Professional Services

Expert-Led. Outcome-Focused. Built for Modern Enterprise

Turn security investments into measurable business outcomes.

## Built Right

Engineered - not just configured

## Fixed-Scope

No surprise cost or scope creep

## Spend to Value

Your stack, fully deployed and defended

### WHAT WE DELIVER

**AUZA Professional Services** activates your security investment. Our certified architects, engineers, and advisors design, deploy, and operationalize security programmes that are scalable, compliant, and tailored to your risk profile – closing the gap between procurement and protection.

### WHERE WE ADD VALUE

#### 01 Deployment & Configuration Powered by Microsoft Purview

Structured deployment across your full security stack — threat detection, SIEM, data governance, identity, and endpoint management. Proven methodologies, staged rollouts, and complete handover documentation ensure a smooth transition to operations.

##### KEY OUTCOMES

- AI risk register & heat map
- NIST AI RMF gap analysis
- Remediation roadmap

#### 02 Security Architecture Design Secure. Scalable. Future-Ready.

Secure, resilient environment design rooted in Zero Trust principles and proven cloud adoption frameworks. Our architects address identity, network segmentation, hybrid cloud, and data governance — embedding security at every layer of your architecture.

##### KEY OUTCOMES

- Zero Trust architecture & reference Design
- Threat modelling & risk assessment
- Technology roadmap & gap analysis

#### 03 Training & Knowledge Transfer Empowering Your Team to Own Security.

A deployment is only sustainable if your team can operate it confidently. We deliver role-based training for SOC analysts, IT administrators, and security leads — covering your full security stack. Workshops are hands-on, scenario-driven, and tailored to your environment.

##### KEY OUTCOMES

- Hands-on, role-based training workshops
- Custom SOC playbook development
- Knowledge transfer & enablement

#### 04 Compliance Advisory Navigate Regulation with Confidence.

End-to-end compliance advisory across MAS TRM, Singapore PDPA, ISO 27001, NIST CSF, and CIS Controls. Our advisors map requirements to your existing security environment, identify gaps, and produce audit-ready evidence packages to accelerate certification.

##### KEY OUTCOMES

- Regulatory gap assessment & control mapping
- Audit-ready evidences packages
- Compliance roadmap & reporting

### HOW WE ENGAGE - SIMPLE, STRUCTURED, BUILT AROUND YOUR BUSINESS

#### Step 1 - Discover & Scope

Every engagement starts with structured discovery - understanding your environment, objectives, and constraints from outset

#### Step 2 - Design & Plan

Detailed delivery plan, architecture artefacts, and project schedule — produced by our architects and aligned for stakeholder sign-off.

#### Step 3 - Deliver & Validate

Certified engineers drive delivery — milestone check-ins, QA gates, and stakeholder updates keep every engagement on track and on time.

#### Step 4 - Handover & Enable

Full documentation, live handover, and optional hypercare support — every engagement closes with a clean transition to your team.

### FRAMEWORKS AND STANDARDS

ISO 27001

NIST CSF

CIS CONTROL

MAS TRM

Singapore PDPA

SOC 2 TYPE II

### WHY AUZA FOR PROFESSIONAL SERVICES?

#### 1 Certified Practitioners

Industry-recognized expertise across security, cloud, and compliance.

#### 2 End-to-End Delivery

Architecture, deployment, training, and compliance under one engagement model.

#### 3 Locally Relevant

Local presence with deep APAC regulatory knowledge and on-site capability.

#### 4 Outcome-Driven

Fixed-scope engagements with clear success criteria and exec-level reporting.
